Shutters

As innovators of outdoor-living solutions in New Zealand for many years, Shade Elements is bringing their expertise indoors. With a reputation for quality and an eye for interior design, Interiors by Shade Elements is a trusted choice to reinvigorate your home.

With their traditional appeal Shade Elements Shutter Collection offers a modern classic addition to your décor with a choice of either sustainably grown timber or synthetic construction to suit your application. Shade Elements Shutters will enhance the look and feel of an interior space as well as providing versatility for windows and doors during the ever-changing seasons.

Wanaka Timber shutters, beautifully crafted using sustainable, lightweight Paulownia wood sourced from certified plantations and kiln dried to best suit our environment. With a wide range of customisation available, our Wanaka shutters are among the most versatile in the market and superior joinery stability makes this material ideal for large panels, like hinged doorways, increasing their longevity and reliability in a home environment. Mortise and tenon joinery and carefully detailed mouldings provides a stunning finished product.

Omaha shutters are extruded using a synthetic non toxic material making them ideal for wet areas including bathrooms and laundries and ensuring a durable product suited to the New Zealand climate come rain or shine. Reinforced with aluminium to add stability and reduce weight, our Omaha shutters are a hardworking product as well as being an affordable solution for use throughout the home.
